Movie DVD Copy 1.3.7 Free [Mac/Win]

Movie DVD Copy is a software tool that can be used in order to help individuals backup the contents of their DVDs, or copy them to another disc. Quick install and clean UI The installation process does not bring any kind of surprises and does not take longer than a few moments, while the UI you come face to face with presents a clean and modern design. It consists of several buttons, a few drop-down menus and panels to help you preview videos and all the contents of the loaded DVD. It becomes quite clear it can be used with great ease by anybody, from beginners to highly experienced people. Furthermore, Help contents are provided, thus ensuring the fact that you can learn how to handle it properly. Options to tinker with This software utility supports both D5 and D9 DVDs, and enables you to eject, load, copy, burn and erase discs, with just a click of the button. From the settings panel, you can easily choose the output directory, the type of DVD and copy method (normal or enhanced). Furthermore, the burn engine is also subject to change and you can enable or disable RCE removal (Regional Coding Enhancement) and automatic burn, and it is possible to delete the temporary folder when DVD cloner is finished. CPU and memory usage is low to moderate, which means that the computer's performance might be affected at times, and that is why it is a good idea not to run it alongside other demanding programs. Conclusion To sum up, Movie DVD Copy is a useful piece of software which can be used by anybody. There are plenty of options available, all tasks are completed in due time and we did not pick up on any errors or crashes during our tests.
